

Mipa 2K-HS-Express-Filler FX 5

Highest performance from the bottom up

Mipa 2K-HS-Express-Filler FX 5 is a high-quality two-component filler for fast and economic car refinishing that generally does not require oven drying.

- Extremely fast drying
- Very fast curing at a room temperature of 20°C.
Sandable after a drying time of approx. 20–40 minutes
(depending on air humidity, film thickness and temperature).
- If required, oven drying is possible
- Perfectly suitable for partial car coatings and spot repairs
